

## CURRICULUM NOTES – 2021 / 2022 YEARS 7 & 8 (Senior Section)

### Introduction

The top two years at Hall Grove are special in several ways; as they are now at the 'top of the school', the children are given ample opportunity to develop leadership skills and we emphasise the importance of contributing to the school community through a variety of means. We hope that they will be asked to act as Open Day guides, to assist in the junior part of the school or to help the staff set up the hall and other similar duties as part of the Monitoring System. We aim to respect them as senior pupils, and in turn, we look to them all to set a good example for the younger children to follow. We hope they will help us create a happy and productive working atmosphere throughout the school. All these opportunities run alongside a rigorous academic programme which will be outlined in this document. The children are prepared for Common Entrance and, in some cases, scholarship exams for entry into their Senior Schools.

Below is a brief explanation of the concerns structure which we employ in Years 7 & 8. On top of this comprehensive stream of information, if you have any individual issues which you would like to raise, then with due notice it is possible to make an appointment with the relevant member of staff:

- a) the House Tutor, Mrs Harris (for matters concerning boys' pastoral issues), or Mrs Randall (for matters concerning girls' pastoral issues),
- b) the Subject Teacher or Study Tutor for academic issues, or
- c) the Section Head of Years 7 & 8.

**We ask that planners are seen by parents regularly and signed at least once a week. The planners are the primary form of communication between home and school, so please consider writing a note rather than sending an email.**

**Autumn Term** – there will be one Parents' Interview evening. You will receive two sets of effort and attainment grades and one set of exam results.

**Spring Term** – you will receive one set of effort and attainment grades and one set of exam results. There will be Parents' Interviews for Year 8.

**Summer Term** – Year 7 Pupils will receive one sets of effort and attainment grades, a full End of Year Report and one set of exam results. Year 8 pupils will receive their Common Entrance Results in addition to a full End of Year Report

### Learning Support

Hall Grove is a non-selective school and we welcome children of all learning abilities save those who need highly specialised intensive support. The Learning Support Team is Mrs Gilly Harris, Mrs Tamara Laws and Mrs Alexandra Moore. We believe that the strengths of every child should be celebrated and it is understood that some may require specific tools or learning interventions at different stages of their journey through the school in order to achieve their best and become well rounded confident individuals. The Learning Support staff work closely with both class teachers and parents and we are committed to enabling every child to achieve his /her academic potential. Please contact Mrs Harris should you have any queries regarding learning support.

**Luke McLeod**

## **English**

Pupils will undertake a course of study that will lead to them either taking Common Entrance, in the final term of Year 8, or scholarship, in the second or third term of Year 8. The content of the curriculum is broadly the same for all classes in each year, although texts studied may vary slightly. Differentiation exists in both the methods of explanation of the subject matter and the children's responses to what they are being taught. The English department aims to instil an appreciation and enjoyment of language and the four key skills of: listening, speaking, reading and writing.

The Common Entrance Syllabus requires the children to be familiar with a variety of works although there is no requirement to write on a studied text. This gives us the opportunity to enjoy a range of interesting, stimulating and challenging books. Scholarship papers are far more open-ended, with no prescribed theme or set structure at times and a wide diversity of expectations for the individual papers. The following are examples of set texts that may be used depending on the interests of each class:

- Year 7: *Animal Farm* by George Orwell and *Lord of the Flies* by William Golding as well a range of poetry and extracts from fiction and non-fiction texts.
- Year 8: *Journey's End* by R. C. Sherriff and *The Graveyard Book* by Neil Gaiman as well a range of poetry and extracts from fiction and non-fiction texts.

The Year 7 CE syllabus is changing subtly and can be perused [here](#).

*Henry Toulson, James Fletcher & Mark Hayward*

## **Mathematics**

Maths in the senior part of the school should enable all pupils to become fluent with fundamental mathematical concepts and provide a solid foundation for future progress.

### **Year 7**

The pupils in Year 7 continue the Common Entrance Mathematics syllabus. It has changed slightly this year and details can be found by visiting the ISEB website. Pupils will study and become familiar with most of the skills and knowledge of Key Stage 3. By the end of the year all pupils should have covered the majority of topics required to sit the two core papers.

Prep will be set once a week and regular testing will take place to ensure continual recap and review. All pupils are expected to have a scientific calculator available for every lesson.

### **Year 8**

The pupils in Year 8 will be working towards either Common Entrance or Scholarship examinations. Pupils in Set 3 will conclude their study of the topics laid down by the Common Entrance exam syllabus. They will be working towards Level 1 or 2 CE exam papers. These consist of two 60-minute exams (one non-calculator and one calculator paper). There will also be a short mental arithmetic test, lasting about 30 minutes.

Pupils in Set 2 will study the additional topics required for the extended Common Entrance syllabus. They will be working towards Level 2 or 3 papers (one non-calculator and one calculator). There will also be a short mental arithmetic test, lasting about 30 minutes.

Pupils in Set 1 will either work towards Level 3 CE or study the content and format of individual scholarship papers in order to prepare them for examinations appropriate to their choice of school. These children will be expected to work outside normal school hours.

Prep will be set once a week throughout Year 8.

*Jane Brice, Lee Parfitt, Jake Tucker & Luke McLeod*

## **Science**

Science is a word that paints a picture in the mind, but that picture is different for each person. For some, perhaps you included, the word inspires anxiety of their own school days, staring at a chalkboard and learning equations from a textbook. This is not how we learn at Hall Grove. Chemistry, Biology and Physics are taught in a way to encourage the children to have a passion for discovering how the world works. They are guided through this process of discovery by Mr Wheeler (Biology) and Mr McLeod (Chemistry and Physics) as they are encouraged to think scientifically through practical work and investigations.

Through this process a thorough understanding of the scientific method and a knowledge bank full of facts should be the outcome. They will, of course, use this to help them score highly in exams, but more importantly, they take this on to their secondary school and beyond where perhaps one day, they'll be strolling across the Savannah or working to explore the mysteries of the cosmos themselves.

For a full breakdown of the CE curriculum, please see the [ISEB 13+ website](#). Please see the Frog site 'Senior Science Hub' for a full list of topics and resources that can be used to support and reinforce your child's learning.

### *Year 8 Final CE Exam*

Each Science discipline is equally weighted and the exam takes the form of three forty-minute papers; one on Biology, one on Chemistry and one on Physics.

The focus in the Spring and early Summer Term will be on completing the syllabus and trying to improve our revision and exam techniques. All children are prepared to take the same Common Entrance Science papers at the beginning of June or scholarship exams for their senior schools.

*Michael Wheeler & Luke McLeod*

## **Computing**

Pupils in Years 7 and 8 will undertake a course which follows the Key Stage 3 National Curriculum for Computing which includes Computer Science, Information Technology and Digital Literacy. The skills and knowledge developed in the course cover many of the foundation blocks needed to take on future challenges at GCSE and A level.

The units of study are designed to be informative, motivational and, above all, fun. They will help to foster independence, resilience and a desire to succeed, building confidence, through the development of skills and understanding, in a subject area which has a huge impact on our day-to-day world. The embedded problem solving and ICT content will also be of benefit to pupils from a cross-curricular point of view, and of course become invaluable skills for life.

*James Foley*

## **French**

### **Year 7**

This year, pupils will study a variety of topics relating to everyday life and work towards the Common Entrance exam, which broadly follows the National Curriculum Key Stage 3 syllabus for Modern Foreign Languages. Equal attention is paid to the four skills of speaking, listening, reading and writing, as they carry equal weight at Common Entrance. Correct spelling and grammatical accuracy are important and will be taught within the context of the topics studied.

All pupils will be expected to be able to recognise and use the present, perfect and future tenses of several key verbs by the end of the academic year.

In the Summer Term, all pupils will sit a full mock CE examination paper with a slightly reduced oral exam. The reason for this is that all topics will not have been covered sufficiently by the end of Year 7 to allow a full oral test.

## **Year 8**

The aim, by the end of the academic year, is to bring all sets of Year 8 up to the Common Entrance (and scholarship, if applicable) requirements to match their chosen senior schools. Note that senior schools normally expect students to present the CE Level 2 paper and this is the paper we will prepare them for. The four key topics are: *Myself, my family and my friends*, *My school and daily routine*, *Where I live*, and *My weekends and holidays*.

The four skills of reading, writing, listening and speaking will all be examined at CE with an individual recorded oral test in the Spring Term, 2021. These are the skills that we will practise in lessons and pupils will be asked to do some learning and written homework each week.

*Andrzej Korzeniowski & Philip White*

## **Geography**

The aim of the Geography syllabus is to encourage pupils to look at the world and the processes that shape it, both physical and human. It is taught through a number of case studies that will be used to flesh out exam answers in CE and Scholarship papers. As far as possible, we follow the principles of Enquiry-based Learning methods: we begin with a question and try to share our knowledge as we explore deeper.

### **Year 7**

#### **Autumn Term**

Settlement, exploring historical and geographical aspects, including Hall Grove and the local area.

#### **Spring Term**

Tectonic Processes: earthquakes, volcanoes and tsunamis – causes, effects and human responses in LEDC and MEDC countries. Extreme weather events.

#### **Summer Term**

Rivers and Coasts, hydrological features and processes.

Through the year we practise map reading, learn global location facts and try to keep abreast of some of the major geopolitical events. By the end of the year the pupils should all be able to manage a CE paper.

### **Year 8**

In the course of this year, Year 8 pupils are guided towards the recognition that they have sufficient knowledge to do well at CE. We do plenty of practice as the exams approach, but to maintain interest and the sense of moving forward a few topics are left for the final year.

Through the year we practise map reading, revise the global location facts and try to keep abreast of some of the major world events. Key topics are *Industry*, *Transport* and *Population*.

Data collection for the fieldwork project (which forms part of the CE assessment) will be undertaken following a one-day field trip. Topic still under consideration.

*Harry Quartermaine*

## **History**

### **Current Year 8**

We follow a 2-year Common Entrance syllabus entitled ‘The Making of the United Kingdom, 1500 – 1750’. The skills required for success in this exam are those which will hold the children in good stead for future challenges at GCSE and A level.

The periods of study are:

Year 7 – The Tudors

Year 8 – The Stuarts

The children are encouraged to use any and every resource available to them – television and film, books and magazines, exhibitions and ICT.

### *The Common Entrance Examination*

A one-hour paper, divided into two sections. The evidence question carries 20 marks and the essay 30. The syllabus can be found on the ISEB website.

### **The new ISEB curriculum – current Year 7**

Year 7 are beginning the new Common Entrance history curriculum. Over the course of the next two years, students will explore topics from The Making of the UK (Year 7) and then Britain and Empire (Year 8). The subject will be taught thematically focusing on leadership, war and rebellion & life and change. The final exam will consist of a source question and an essay question – both split into three parts. More details can be found through [this link](#).

The history department at all times aims to enthuse, encourage curiosity, healthy debate and an ability to think for themselves.

*Tim Lewis & Henry Toulson*

### **Latin**

Over the two years, the children will learn and consolidate the building blocks of Latin to ensure that they have a secure foundation of its grammar and vocabulary. Our aim is to promote and nurture a love of Latin, whether that be for the logic and rules of its grammar, for the English derivatives of its words or for the wonders of its mythological world.

We use text books which follow the ISEB syllabus which ensures that the pupils become very familiar both with the prescribed grammar and vocabulary as well as the terminology used in Common Entrance exam papers.

Common Entrance has undergone a slight change which will come into effect in 2023. For both years 7 & 8, Latin is tested at three levels of ability. For year 8, all three levels will consist of: a comprehension, a Latin to English translation, grammar questions (including two English to Latin sentences), and a question on classical civilisation (in English). However, for year 7, the classical civilisation question has been removed at all levels, and more emphasis will be placed on English to Latin translation.

Pupils in both year groups will continue to be prepared for the level of CE which is appropriate to their ability or for any scholarship exam which may be undertaken.

Prep is set once a week at least 48 hours before the work is due. The written prep most often consists of exercises from the text book reinforcing work studied in class. Sometimes there will also be vocabulary to be learnt, for which usually a week's notice is given, to allow for long-term memory learning rather than simply for the test. Vocabulary given for preps is always loaded onto Quizlet as another means by which the pupils may access the material and self-test.

*Lucy Holmes & Andrzej Korzeniowski*

### **Ancient Greek**

There are two lessons a week for pupils in both 7 & 8. In Year 7 it is compulsory for Set 1, but at the school's discretion for pupils of Set 2. At the end of Year 8, pupils will take the appropriate Common Entrance level, of which there are two, or a senior school's own scholarship paper. The ISEB have taken into consideration that prep schools have limited time within their curricula for Ancient Greek and the syllabus fairly reflects this time restraint. Similarly, at scholarship level, secondary schools are generally pleased to see any level of Greek and just want pupils to show what they know.

The setting of prep is the same as for Latin.

*Lucy Holmes*

## **Theology Philosophy and Religion (TPR)**

*A copy of Today's New International Version of The Bible is recommended for homework and revision, or an online Bible such as [www.biblegateway.com](http://www.biblegateway.com)*

### **Year 7**

Pupils will follow the ISEB syllabus for Theology, Philosophy and Religion. This will involve studying Bible topics and debating moral and ethical issues. There will be a strong focus on explaining and justifying your opinions, as well as responding respectfully to the ideas of others.

### **Year 8**

Pupils will continue preparing for the CE exam in TPR, or scholarship exams as applicable.

*Jannine Frame*

## **Extended Project**

This course is designed to both improve independent study skills and develop a curiosity about the world and is a exciting introduction to the kind of extended project work that many children will find themselves involved with at their secondary school and beyond. On their way to producing either an ethic argument or an 'artefact' project, the pupils will be encouraged to consider the quality of their sources and will be taught to avoid misinformation. The Year 8 projects will be submitted for the new ISEB Project Qualification – a junior version of the increasingly popular Extended Project Qualification studied by KS5 students.

*Luke McLeod & Elizabeth Locke*

## **Performing Arts**

This year, both Year 7 & 8 will be taught Music, Drama and Dance as part of a Performing Arts rotation once a week, co-taught by myself, Miss Macfarlane (Drama) and Miss Erridge (Dance). Both year groups are immersed in the three different disciplines and primarily we hope to develop their enjoyment of these subjects, so they feel confident in participating in all Performing Arts opportunities when they move up to senior school.

Year 7 will be staging a production (to be announced) in the Spring Term, whilst Year 8 will have a performance after the CE exams.

*Lizzie Post*

## **Visual Arts**

In Years 7 and 8 students follow a carousel that takes them through some exciting specialist areas. In Year 7 this year they will rotate through Art, DT and Food twice. In Year 8 the students will rotate once through each of Art, DT, Food, Robotics and Textiles. They will learn to design, make and create using a range of media, whilst developing their abilities to problem solve, evaluate and innovate. The teaching team brings specialist skills and subject knowledge, which encourage children to explore, create and express themselves. Each area brings a wealth of opportunities and students typically find great enjoyment and creative success. We aim to nurture happy and confident children in an environment where challenge and creativity is at the centre of their learning experience.

*Catherine Foley, Michael Johnson, Miranda Peters, Gilly Harris and James Foley*

## **The Journey**

### **Personal, Social and Health Education with Citizenship**

The PSHE and Citizenship program is part of *The Hall Grove Journey*. It promotes thoughtful and positive thinking about the individual, their role in society and health issues relevant to the age group. It helps to give children the skills, knowledge and understanding they need to lead confident, healthy and independent lives. PSHE tackles many of the spiritual, moral, social and cultural (SMSC) issues that are part of growing up. Citizenship involves preparing the child for life as a responsible citizen; that is, teaching 'skills for life'.

PSHE underpins all the teaching, learning and playing in the School, and works hand-in-hand with the pastoral care of the whole School. It allows children to discuss themes and role-play certain situations in the safe and caring environment of the classroom, enabling them to be more confident when facing similar situations in the future. At its heart lies group work which can facilitate open attitudes towards dialogue, discussion, and consideration of multiple perspectives. It shows a respect and interest for the whole child and not just their academic ability, physical or artistic skill. Its aim is to nurture responsible, well-informed and caring individuals.

Different themes will be explored in a specific lesson each week and in assemblies where appropriate. Aspects of PSHE will be covered in specific subjects where relevant – for example, ‘Healthy Eating’ in Science. We follow the statutory guidance for Sex and Relationship Education. Sex Education is introduced from Year 7 in line with the secondary curriculum.

*Leigh Randall*

## **Physical Education**

Physical Education contributes to the general education of a child through physical activity and offers opportunities for pupils to:

- become skillful and intelligent performers
- acquire and develop skills performed with increasing physical competence and confidence in a range of physical activities and contexts
- learn how to select and apply skills, tactics and compositional ideas to suit activities that need different approaches and ways of thinking
- develop their ideas in a creative way
- set targets for themselves and compete against others, individually and as team members
- understand what it takes to persevere, succeed and acknowledge others’ success
- respond to a variety of challenges in a range of physical contexts and environments
- take the initiative, lead activity and focus on improving aspects of their own performance
- discover their own aptitudes and preferences for different activities
- make informed decisions about the importance of exercise in their lives
- develop positive attitudes to participation in physical activity
- develop their overall knowledge and understanding of the subject

The PE programme this year will work its way through the following subjects:

Autumn Term –, Invasion games Health related fitness

Spring Term – Gymnastics

Summer Term – Tennis, athletics and swimming.

## **Games**

The games programme runs independently of the PE. For the girls the sporting year will be in the following order: hockey (Autumn), netball (Spring) and cricket (Summer). The boys will play football (Autumn), rugby (Spring), hockey (Spring) and cricket, Athletics (Summer).

Throughout the year every child will get the opportunity to represent the school in all the major sports. The teams will be selected firstly from the appropriate year group but if numbers are low then players from the year below will be selected if permitted by the laws of the sport. The exception for this rule will be tournaments and cup matches where the strongest Hall Grove team available will be put out.

Please note that boys and girls are expected to be available for all weekend fixtures. Written permission for weekend absence from a school match must be obtained from the Director of Sport or the Headmaster at least a week prior. If ill on the day of a Saturday fixture please telephone the Sports Office (01276 470009) by 0800 at the very latest.

**Ian Tullett**
